Risk Mitigation Filter

A short screening instrument for fencing and grazing alternatives

RightRisk™ *How Much Risk Is Right For You . . .*

Ranch/Property Covered: _____ **Date:** _____

Decision problem: _____

Alternative (up to 5 named)	**Problem Fit** S/M/C/P	**Risk Source** M•P•I•H•F underline primary	**Control Type** Av•RP•RC•Tr•Ca•Ac underline primary	**Feasibility** I•L•Lg•A•Ct indicate Y/N/C	**Up-front Cost** L/M/H/E	**Recurring Cost** L/M/H/E	**Failure Consequence** L/M/H	**Next Step** tool/specialist or "Filter OK"
SQ-0 **Status quo** (no change)								
ALT-1								
ALT-2								
ALT-3								
ALT-4								
ALT-5								

Ratings: **S** = Strong, **M** = Moderate, **C** = Conditional, **P** = Poor | **L** = Low **M** = Moderate **H** = High **E** = Extreme
Risk Sources: **M** = Market, **P** = Production, **I** = Institutional/Legal, **H** = Human, **F** = Financial
Control Types: **Av** = Avoid, **RP** = Reduce Probability, **RC** = Reduce Consequence, **Tr** = Transfer, **Ca** = Increase Capacity, **Ac** = Accept
Feasibility Flags: **I** = Infrastructure, **L** = Labor, **Lg** = Legal, **A** = Animal-Management, **Ct** = Contingency
Feasibility Ratings: Y = Yes, **N** = No, **C** = Conditional

Routing

← Continued from front

Decision outcome - check one when a decision has been reached:

☐ Reject ☐ Defer ☐ Trial ☐ Partial adoption ☐ Full adoption

Or, if further analysis is needed:

☐ Decision pending deeper analysis

Tool routing (check one or more):

☐ Filter OK ☐ + RSP ☐ + MTRA ☐ + ERA ☐ + FRA ☐ + RDFinancial ☐ + Risk Navigator ☐ + Specialist Review

Key uncertainties to carry into the deeper tool:

Notes (reference by row ID):

Escalation check - For each alternative (row), count only C = Conditional ratings entered in Problem Fit and the five Feasibility ratings. More than three C-ratings in one row requires further analysis or specialist review. Other conditions may also require escalation. Extreme (E) cost requires deeper analysis. High (H) Failure Consequence requires deeper analysis and/or specialist review. Neither qualifies for Filter OK.

Fit-for-purpose check - If several ratings cannot be made with reasonable confidence, the RMF may not provide enough detail for the decision. A deeper RightRisk analysis tool or specialist review may be appropriate.

What to do with this filter

Keep with operation records. Revisit at reassessment. Bring to an advisor session if applicable. If escalating to a deeper tool, carry the key uncertainties listed above into that analysis.

Risk Mitigation Filter v0.3 - The Risk Mitigation Filter does not recommend a specific outcome. Ratings entered on this form reflect the producer's judgment for the operation and decision being evaluated.
